

Technical Data Sheet

ECS ELECTRO DEGREASER

Art. Nr. 706

Product description

ELECTRO DEGREASER is a special mixture of various heavy duty solvents to remove oil and greases from electrical and mechanical equipment quickly and reliably. It also removes wax, dirt, moisture and other heavy soiling. ELECTRO DEGREASER evaporates and leaves the surface clean and dry without any residues. Due to its low surface tension ELECTRO DEGREASER penetrates into inaccessible areas and thin cracks, removing the contamination and moisture. Therefore it improves the performance and prolongs the lifetime of the equipment.

Application

ELECTRO DEGREASER is suitable for degreasing of installations, appliances and components. Particularly suitable for electric motors, high-voltage switchgear, cables, switchboards, cables, wire ropes and chains. However, it is equally suitable for the cleaning of mechanical equipment such as brakes, clutches, air tools, air conditioners and compressors.

Please note

Electronical devices to be switched-off during cleaning and plug to be taken out. Cleaning instructions of appliance producer to be taken into account. Further information concerning ELECTRO DEGREASER to be found in recent MSDS.

Technical Data

Appearance:	Clear, colorless liquid
Smell:	Solvent
Density at 25° C:	0,83 [g/cm ³]
Evaporation:	Average
Material compatibility:	Good
Surface tension:	27[mN/m]

Storage / Shelf Life

Shelf life is 2 years if stored correctly.
